E.coli and total coliforms, pk/25

Réf. produit: 2495525
EUR Prix: Nous contacter
Livraison en 2 semaines

Presence/Absence Broth with MUG ampules provide an easy-to-use test, ideal for screening drinking water samples for the presence of Total Coliforms and E. coli bacteria. Simply combine the P/A broth with your 100 mL sample and incubate for 24 to 48 hours at 35 °C. A colour change to yellow or yellow brown indicates presence of coliform bacteria.
